💥BOMBSHELL: European Parliament confirms a COVID vaccine lottery—and some got the kill shot.

In a shocking admission that validates what millions suspected, the European Parliament confirmed the COVID vaccine rollout was a calculated experiment with human lives. Not everyone received the same formula—some got a low-concentration mRNA dose while others received what whistleblowers are calling "the kill shot"—a lethal amount designed to eliminate rather than protect.

But the deception runs even deeper —a troubling procedural order keeps both the public and even doctors from being fully informed. There are two sets of adverse data: one the pharmaceutical companies keep hidden, and one carefully curated for public consumption.

Perhaps the most damning: According to Marcel de Graaff of the FVD MEP, the EMA—Health Canada's equivalent—knew the mRNA vaccines neither treat nor stop transmission of COVID-19. Even worse, they concealed evidence that vaccinated people were MORE likely to contract the virus.

This isn't just a medical scandal—it's a crime against humanity.

Sadly, the eagerly and indifferently jabbed will largely not care, no matter how severe the crime was.

They either refuse or don't care to look at that data.

They just want to move on in their bliss.

crimes against humanity is an understatement, these mental whores have caused crimes against anything that is " LIFE" ---
